Applications

The precision chippers of the DH series process waste wood, wood slabs and logs to different sizes of wood chips. The machines can handle trunk diameters up to 900 mm – be it scrap wood or trees in their entirety.

Advantages

- Solid construction for continuous, industrial-scale operation
- Closed, robust chipping drum produces evenly shaped wood chips
- High rotor weight of > 3.5 t for constant rotation speed, low fuel consumption and evenly-shaped wood chips
- Custom-built rotor with 45 mm blade advance for economical production of very large wood chips
- Mountable on semitrailer chassis for easy transportation worldwide
